

RAJENDRA PRASAD HALL – 03/02/2017

- Plenty of **fly catchers** are needed in the mess, cooking area and utensils cleaning area.
- **Chimney** is needed in the kitchen
- The food quality is good

Civil and Sanitary work

- **The whole drainage system is in a horrible condition.** The drains are not built in a proper way which is causing water logging. The water logging near the kitchen area has become the breeding ground for flies and mosquitoes. These needs to be repaired and covered in an urgent basis.
- The bathrooms are stinking horribly
- **White washing and plastering needed in the whole hall. At many places the plasters are coming out**
- The walls of corridors and bathrooms are soaking
- Window glass panes are broken and needs to be changed
- Electrical wiring are coming off the walls
- **There is an unauthorized shop near student room. It should be removed otherwise it can cause security issues**

Photographs attached of pathetic state of drainage clogged in the hostel.
