

Dr Asutosh Mukherjee Hall – SAM, 11/04/17

Dining Hall

- Fly catchers are not working
- Snacks & Lunch (as we saw) are not up to the mark and they are very oily.
- Bain merry and fly catchers are needed
- Because the kitchen and septic tank (just beside the dining hall) has issues, there's a foul smell even in the dining hall.

Kitchen

Kitchen is very very dirty

- The washing area is very dirty
- The kitchen slabs where they are keeping the cooked food container are very dirty, needs to be cleaned every day.
- The burner slabs are broken and needs to be repaired
- Kitchen floors are very very dirty and it stinks. There's a bad foul smell.
- Flies are there
- The windows in the cooking area are very unclean and full of cobwebs. They need to be cleaned every day
- Some of the window pane needs to be changed
- The new grinder is not being washed properly and the bottom area where it is being kept is also dirty
- The area below the kitchen slab is very dirty and its stinking
- In store room **exhaust fan** is needed
- **Bain merry** and fly catchers are needed.
- **Chimney** is needed
- **Utensil racks** are needed

Sanitary and Civil

- The outer area of the kitchen is also very dirty
- Septic tank is overflowing. Repeated complaints not being taken care of. This septic tank smell is reaching even the dining area which we feel is very unhygienic. Girls facing issues eating there.
- Room no 130 sewerage and drainage pipe are broken. They are causing soaking and in turn damaging the wall of many rooms. **They have given the complain to the Sanitary people but they are not taking any action (Urgent)**
- The skylight of the rooms and the glass window pane of almost every bathroom in the ground floor are broken. They needs to be replaced with frosted glass. Being a girl's hostel, this bathroom privacy part needs very urgent attention.
- Library wall plasters are coming off. Needs civil action
- The students are asking for the wireless internet connection in the library
- The duct pipes connected to every bathroom are broken. Needs replacement, otherwise they are causing soaking problem and in turn damaging the walls. Too many rooms are in a very bad condition with the soaking. Again complaints given but no remedy done.
