ANNEXURE - I

Technical Specifications of 25 Litres Electric Water Geyser (ISI marked)

Design:

The water heater comes with a water storage capacity of 25 litres along with CRC powder coated ABS body having anti-corrosive property, and equipped with a stainless steel inner tank that is coated with rust-resistant material.

Water Heating Technology:

Electric water heater with well coated copper heating elements which can resist against oxidation and carbonization. The water heater should make use of certified heating elements that conforms to the highest standards of safety. The water heater should also come with necessary safety devices to give protection against over-heating, over-pressure and dry heating. It also should come with thick PUF insulation in order to retain the internal heat and temperature of the heated water for long time.

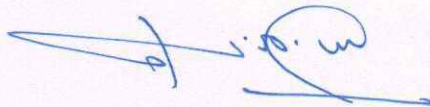

Power Consumption:

2kW rated power and is 4-star rated according to BEE standard.

Other Features:

The ISI marked geyser should include other features such as Fusible plug, Vacuum release valve, Non return device, Adjustable thermostat, Pressure release valve, Drain plug, , and Glass wool insulation.

It should come with a minimum **1 (one) year warranty on complete geyser** and **minimum 3 (three) years warranty on inner tank**.
